

April's Story

When I became pregnant, I thought it was impossible. I was jobless, single, and I was scared to death. Several people suggested I should have an abortion, so thinking there was nothing else I could do, I drove to the abortion clinic carrying a heavy weight on my shoulders. Inside I was desperate for a miracle.

And a miracle happened.

As I pulled into the parking lot, a man waved down my car and gave me directions to the Life Centers nearby instead.

At Life Centers I spoke to a peer counselor who showed me what a growing fetus looked like, talked about the heartbeat, and explained my options. She was the first person to actually share joy in this difficult situation in my life. She gave me a big hug and told me that Life Centers would help in any way they could with material and emotional support. It gave me chills. The most amazing feeling swept over me. The people at the center were so full of life and were spending their own personal time to help me and save my child.

After choosing life, I eventually began talking to God, reading my Bible, and I embraced forgiveness. I enrolled in college with a major in nursing, which I am currently finishing.

If it had not been for the kindness of those at Life Centers, my story would have been severely different. Instead, my son is alive, and I thank God for the miracles he has done!

April and her son, Austin
